

TM1004

25cm 10" 200W RMS 4Ω Marine Subwoofer with polypropylene cone ABS frame and water resistant spider

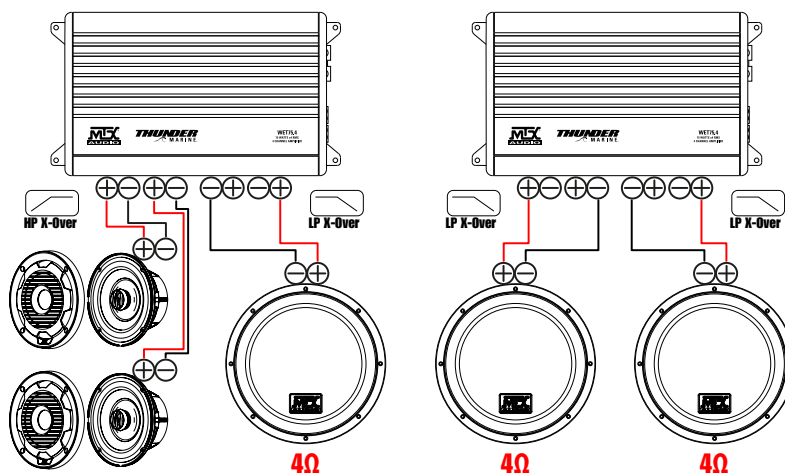

The MTX TM1004 200W RMS 25cm 10" marine subwoofer is specialised in low frequencies reproduction in difficult conditions. It is resistant to water, dust, mud... It works in free air, it doesn't need any enclosure, a wall is enough. It is the perfect companion for the WET75.4 amplifier.

ASA Grille included

System diagram with 1 or 2 subwoofers

Designed to meet the durability and reliability requirements of the marine environment

Teteron neodymium magnet tweeter for dynamic and powerful sound

Polypropylene membrane resistant to humidity and sunlight

Conductive wires resistant to humidity and sunlight

Gold plated connectors to resist corrosion

ASA grills (Acrylonitrile styrene acrylate excellent weather resistance)

Waterproof ABS chassis to resist corrosion and house the magnetic structure and electronic components

Integrated clips to hold cables
